

Family Health Services Division

PURPOSE

Information in this handout serves as a reference document on Department of Health (DOH) Family Health Services Division (FHSD).

OVERVIEW of Family Health Services Division

FHSD programs play a key role in the Department of Health Strategic Plan, particularly in the priority area to invest in healthy babies and families. It falls within the Health Resources Administration within the DOH. FHSD is committed to improving the health of women, infants, children including those with special health care needs, and families. FHSD works to promote health and well-being, with health equity, social determinants of health, and multi-generational approaches. FHSD has three branches – Maternal and Child Health, Children with Special Health Needs, and Women, Infants & Children (WIC) Services.

FHSD Background Information:

- 30 Programs, 18 Grants, ~150 contracts
- 277 Full Time Employee (FTE) Positions
- \$93.1 M Budget 51% federal funds, 34% state funds, 15% special and other funds)

Family Health Services Division

COMMUNITY HEALTH SERVICES: Funded by the Community Health Center Special Fund for contractual services to improve access to health care for medically underserved populations through Federally Qualified Health Centers (FQHC). The array of services includes clinical primary care, behavioral, dental, and pharmacy.

EARLY CHILDHOOD COMPREHENSIVE SYSTEMS: is using the collective impact model to improve young children's (birth through age five) developmental health and their families' well-being and focuses on the County of Maui.

MEDICARE RURAL HOSPITAL FLEXIBILITY PROGRAM (FLEX): Funded by the federal Office of Rural Health Policy for strategic planning activities with an emphasis on quality and financial and operational improvements for Hawaii's Critical Access Hospitals (CAH). This assists small rural hospitals to improve access to health services in rural communities via data tracking, analysis, and benchmarking toward quality improvement. Contracts for rural hospitals provide essential access to inpatient, outpatient, and emergency medical services in rural communities.

ORAL HEALTH: Hawaii is working to rebuild the state's dental public health infrastructure (statewide leadership, data surveillance and assessment, coalition building/partnerships, planning, evaluation, and communications) with funding from the Centers for Disease Control and Prevention.

PREGNANCY RISK ASSESSMENT MONITORING SYSTEM (PRAMS): Funded by the federal Centers for Disease Control, this program is a population-based surveillance system to identify and monitor maternal experiences, attitudes, and behaviors from preconception, through pregnancy and into the inter-conception period.

SMALL HOSPITAL IMPROVEMENT PROGRAM (SHIP): Funded by the Federal Office of Rural Health Policy to support rural hospitals with 49 beds or fewer, allowing them to become joint accountable care organizations (ACOs), participate in shared savings programs, purchase health information technology, equipment, and training to comply with quality improvement activities such as advancing patient care information, promoting interoperability, and payment bundling.

STATE PRIMARY CARE OFFICE (PCO): Funded by the federal Bureau of Health Workforce to designate statewide health professional shortage areas which increase eligibility of skilled health care professionals for federal and state scholarships and loan repayments in exchange for a commitment to work in needy communities. This makes it possible for health care providers to recruit and retain health professionals, thereby improving the health of underserved and vulnerable populations.

STATE OFFICE OF RURAL HEALTH (SORH): Funded by the federal Office of Rural Health Policy to create a focal point for rural health issues within each state, linking communities with state, federal and non-profit resources and helping to find long-term solutions. Program goals include educating providers about new health care initiatives, collecting and disseminating data and resources, and supporting workforce recruitment and retention.

TITLE V MATERNAL AND CHILD HEALTH (MCH) BLOCK GRANT PROGRAM: is a federal-state partnership of the Title V of the Social Security Act to improve maternal and child health throughout the nation to support comprehensive public health systems and services in the state. Funds strengthen the state MCH core public health functions (assessment, assurance, and policy development).

Maternal and Child Health Branch

Maternal and Child Health Branch administers a statewide system of services to reduce health disparities for women, children and families of Hawaii. MCHB programs provide core public health services.

ADOLESCENT WELLNESS: spans across the physical, mental and social emotional aspects of adolescents and young adults 10 to 24 years of age. Concentration on sexual health, positive youth development and transitioning into adulthood.

CHILD ABUSE AND NEGLECT, DOMESTIC AND SEXUAL VIOLENCE PREVENTION: committed to the primary prevention of all forms of violence and stopping violence before it begins so that all people, families, and communities are safe, healthy, and free of violence. The Family Strengthening & Violence Prevention Unit provides programs statewide for the prevention of child abuse and neglect, sexual violence and domestic violence and support for parents.

CHILD DEATH REVIEW: statewide surveillance system for child deaths from ages 0-18 years to reduce preventable deaths to infants, children and youth through multidisciplinary interagency reviews.

DOMESTIC VIOLENCE FATALITY REVIEW: the purpose of the child, maternal, and domestic violence fatality reviews is to reduce the incidence of preventable deaths in our community. The fatality review process analyzes systems responses by community agencies and other organizations involved.

FAMILY PLANNING SERVICES: assists individuals in determining the number and spacing of their children and promotes positive birth outcomes and healthy families. Education, counseling and medical services available through federal and state funded clinical programs. The program provides leadership for the implementation of One Key Question® (OKQ) – “would you like to become pregnant in the next year?” OKQ supports reproductive life planning, decreases unplanned pregnancies, and promotes healthy birth outcomes.

HAWAII HOME VISITING: provides comprehensive Early Identification (EID) with birthing hospitals, physicians, WIC clinics and Community Health Centers to refer expectant families and families of newborns to home visitation services to improve birth, health and development outcomes and reduce health disparities for high risk families in communities at greatest risk (Oahu: Downtown-Kalihi, Ewa, Kalaeloa, Waianae. Hawaii: Hilo-Puna, North Kona, South Kona. Maui: Wailuku, Kahului, Kihei. Lanai and Molokai. Kauai: Lihue, Puhi-Hanamaulu.)

MATERNAL MORTALITY REVIEW: a multidisciplinary review of maternal deaths intended to prevent future deaths occurring during pregnancy and within one year of giving birth.

WOMEN’S HEALTH CLINICAL AND QUALITY ASSURANCE: strives to reduce risk factors that contribute to infant mortality and provides an array of services to address risk factors that lead to poor birth outcomes. Contracts for services that provides services to high-risk pregnant women through pregnancy and six months post-partum.

Children with Special Health Needs Branch (CSHNB)

Children with Special Health Needs Branch (CSHNB) is working to assure that all children and youth with special health care needs (CSHCN) will reach optimal health, growth, and development.

BIRTH DEFECTS: provides population-based surveillance and education for birth defects in Hawaii and monitors major structural and genetic birth defects that adversely affect health and development.

CHILDHOOD LEAD POISONING PREVENTION: reduces children's exposure to lead by strengthening blood lead testing and surveillance, identifying and linking lead-exposed children to services, and improving population-based interventions. Program is funded by the Centers for Disease Control and Prevention (CDC).

CHILDREN AND YOUTH WITH SPECIAL HEALTH NEEDS: provides assistance with service coordination, social work, nutrition, and other services for children with special health care needs age 0-21 years with chronic medical conditions. It serves children who have or may have long-term or chronic health conditions that require specialized medical care and their families.

EARLY CHILDHOOD: focuses on systems-building to promote a comprehensive network of services and programs that helps promote children with special health needs and children who are at risk for chronic physical, developmental, behavioral, or emotional conditions to reach their optimal developmental health.

EARLY INTERVENTION SECTION (EIS) provides early intervention services for eligible children age 0-3 years with developmental delay or at biological risk, as mandated by Part C of the Individuals with Disabilities Education Act. Services include care coordination; family training, counseling, home visiting; occupational therapy; physical therapy; psychology; social work; special instruction; and speech therapy. Parents/care-givers are coached on how to support the child's Development within the child's daily routines and activities.

GENETICS SERVICES: provides information and education about topics in genetics statewide and services to neighbor island families.

GENETICS SERVICES: provides information and education about topics in genetics statewide and services to neighbor island families.

HI'ILEI DEVELOPMENTAL SCREENING: is a free resource for parents of children from birth to 5 years old. Program provides developmental screening via a mail or online screen; activities to help a child develop; referrals for developmental concerns; and information about state/community resources.

NEWBORN HEARING SCREENING: provides newborn hearing screening for babies as required by Hawaii state law to identify hearing loss early so that children can receive timely early intervention services.

NEWBORN METABOLIC SCREENING: provides newborn blood spot testing for babies as required by Hawaii state law. The tests help detect rare disorders that can cause serious health, developmental problems and even death if not treated early.

Women Infants and Children (WIC) SERVICES BRANCH

WIC's mission is to safeguard the health of low-income women, infants and children up to age 5 who are at nutritional risk.

Women Infants and Children (WIC): The Special Supplemental Nutrition Program for Women, Infants and Children (WIC) is a federally funded program that provides Hawaii residents with nourishing supplemental foods, nutrition education, breastfeeding promotion and health and social service referrals. The participants of WIC are either pregnant, breastfeeding, or postpartum women, and infants and children under age five who meet income guidelines and have a medical or nutritional risk.

Hawaii WIC's Breastfeeding Peer Counseling Program, Hi'ilaupoli is an adjunct to WIC services. Hi'ilaupoli means, come together to support breastfeeding. Our Peer Counselors are paraprofessionals recruited and hired from WIC's target population, are available in or outside the WIC environment and offer basic breastfeeding support, encouragement and guidance to WIC mothers.
